PERSONAL PROFILE

I'm from Brazil and I reside in Lisbon. Extensive experience in the area of logistics: warehouse and transport. Worked in American and French Companies.

Experience in: development/leadership of logistics projects and solution design involving cross-functional teams, as well as direct contact with IT and Operations area.

To learn about IT area, I recently finished IT bootcamp in Ironhack Lisbon. So, I'm interested in opportunities that integrate the logistics area with the IT area, being part of teams that deploy products (process, software, apps, innovations) to the Client and that contribute to improve operational productivity.
